## **Claims**

1. (Currently Amended) A poly-V pulley made of metal sheet, comprising:
a cylindrical peripheral wall[,];

annular ears for preventing a V belt from disengaging, the <u>said</u> ear being protrusively formed in axially <u>at</u> both ends of an outer surface of the peripheral wall[,]; and poly-V grooves disposed between the <u>said</u> both ears on the <u>said</u> outer surface of the peripheral wall,

wherein at least one of the <u>said</u> both ears includes an inner ear portion protruded from the end of the peripheral wall to <u>in</u> the outward direction, and an outer ear portion folded back from the protruded outer end of the <u>said</u> inner ear portion to an outer surface of the <u>said</u> inner ear portion, so as to be closely fitted therewith, and the <u>said</u> inner end surface of the ear is formed to be flush with the <u>said</u> inner surface of the peripheral wall.

Claim 2 (Canceled).
